The fundamental Rules for Safe Firearm handling

1. **Always** keep the firearm pointed in a safe direction, typically downrange.
2. **Always keep your finger off of the trigger until you are ready to shoot.**
3. **Always** keep the firearms unloaded until you are at the firing line.
4. **ALL** firearms are to be unloaded, actions open, on the bench and everyone standing back away from them while anyone goes down range.

Whenever you pick up a firearm, immediately engage the safety device if possible. If the firearm has a magazine, remove it before opening the action. Check the chamber to insure it is clear of ammunition. If you do not know how to open the action or inspect the chamber(s), leave the firearm alone and get help from someone who does.

When using or storing a firearm, always follow these rules:

Know your target and what is beyond it.

Be absolutely sure you have identified your target. Equally important be aware of the area beyond your target. This means observing your prospective area of fire before you shoot. Never fire in a direction in which there are people or any other potential for mishap.

Think first. Shoot second.

Know how to use the firearm safely.

Before handling any firearm, learn how it operates. Know the basic parts, how to safely open and close the action and remove any ammunition from the firearm and/or magazine. Remember, a firearm's safety

Be sure the firearm is safe to operate.

Just like other tools. Firearms need regular maintenance to remain operable. Regular cleaning and proper storage are a part of the firearm's general upkeep. If there is any question concerning a firearm's ability to function, a knowledgeable gunsmith should look at it.

Use only the correct ammunition for your firearm.

Only BBs, pellets, cartridges or shells designed for a particular firearm can be fired safely in that firearm. Most firearms have the ammunition type stamped on the barrel. Ammunition can be identified by information printed on the box and sometimes stamped on the cartridge. Do not shoot the firearm unless you know you have the proper ammunition.

Wear eye and ear protection as appropriate.

Firearms are loud and the noise can cause hearing damage. They can also emit debris and hot gas that could cause eye injury. For these reasons, shooting glasses and hearing muffs or plugs should be worn by shooters and spectators.

Never use alcohol or over the counter, prescription or other drugs before or while shooting.

Alcohol, as well as any other substance likely to impair normal mental or physical bodily functions, must not be used before or while handling or shooting any firearm.

Be aware that certain types of firearms and many shooting activities require additional safety precautions.
